TRUCK SCALE PITLESS

- Ideal when weighing operations need to be moved upon completion of a particular work or job. With 6x3m modules the scale grows up to 24m

- Completely finished ready to install and use, 100% steel. Modular design that facilitates and saves its transportation "NO special permit required due to excess dimensions", Quick installation, Includes 2 access ramps.

Includes: Model QDI-11 Indicator, Remote Viewer and Management Software

Model	Capacity	Longitude
BC-6ACP-30T	30,000kg	6m
BC-12ACP-60T	60,000kg	12m

TRUCK SCALE PIT TYPE

100% STEEL

- Its structural design is suitable for traffic of more than 200 trucks per day , since its structure is made up of 6 longitudinal channels that support a top plate with a diamond finish, in such a way that the tires will always be supported by these longitudinal channels ..

cells	30t
mounts and stops	M - Balance
Connection Box	IP-68 Al (Individual adjustment and by section)
Certification	NOM-010
Concentrated load capacity	60t
Ability	From 60 - 100t
Wide	From 3 meters
Length	From 6 meters

Installation with access ramps

Pit Installation

Concrete

The highly durable METROLOGY truck scale has two versions:
a) Pit installation . The concrete floor is placed on the wide flange beams (IPR beams) in such a way that it is a complete slab free of restrictions.

b) Floor installation with access ramps . For this version, the wide flange beams are placed at the lateral ends in such a way that they function as protection or guide rails for cargo trucks. The concrete slab is placed in the lower part, in such a way that its casting does not require formwork.
This installation is recommended for places where there is a lot of room for manoeuvring.
